Spring 2024 CA/B Forum F2F

Validation Sub-committee

Progress since Fall 2023 F2F

- Based on discussions at the previous F2F and follow-up meetings, Michael Slaughter of Amazon Trust Services prepared a draft ballot on 3.2.2.4 (7) improvements

- Was presented yesterday

Progress since Fall 2023 F2F

- MPDV/MPIC effort led by Ryan and Chris of the Chrome Root program closer to formal balloting
  - Draft ballot text largely solidified
  - Plans to initiate discussion period next week

Progress since Fall 2023 F2F

- GlobalSign started discussion on improvements to EV Guidelines to clarify that automation of EV certificates is allowed
  - Presentation of problem statement
  - Discussion of high-level proposed changes
  - Development of draft ballot
  - Will be the first discussion topic today

Progress since Fall 2023 F2F

- Started discussion of identifying Delegated Third Parties in the context of Domain/IP Address validation

- Aaron Gable of Let's Encrypt drafted SC-70, which was discussed within the group prior to balloting and passage
  - Improves clarity regarding acceptable DNS resolvers queried during validation

- Consensus to explore other domain validation methods and add clarity
  - Will be second topic today

Agenda

1. Discussion on EV automation improvement ballot
2. Identifying Delegated Third Parties in the context of domain validation

Discussion on EV automation improvement ballot
